## Additional COVID-19 Safety Measures at Toot Hill School

Dear Parent and Carers,

I do hope you and your family are well. We have experienced a recent increase in the number of our students testing positive for COVID-19. This increase is somewhat expected as this age group has not been vaccinated and national restrictions have been removed. Furthermore, this increase is in keeping with other schools locally.

We prioritise the safety of our students and so have liaised with the Department for Education regarding our response. Following their advice, until further notice, we will:

- Pause year group assemblies in the Concert Hall
- Pause PE activities in the new PE room next to the red gym
- Ensure all external doors to the sports hall and red gym are open during lessons
- Pause singing in Music classes
- Maintain both our in-day and after school cleaning regimes

We will continue to monitor the situation closely and follow the guidance issued from both the Department for Education and Public Health England.

We encourage household members that are aged 11 and over to continue with twice weekly LFD testing to help identify cases promptly. We ask that students record their LFD results with school using the online form found by following this link: [https://www.toothillschool.co.uk/forms/testing\\_result.php](https://www.toothillschool.co.uk/forms/testing_result.php)

### What to do if your child develops symptoms of coronavirus (COVID-19) or tests positive for COVID-19

If your child develops symptoms of coronavirus (COVID-19), they should get a PCR test and remain at home at least until the result is known. If negative, the child can end self-isolation; if positive, the child should isolate until at least 10 days after their symptoms appeared. Symptoms of coronavirus (COVID-19) are a new, continuous cough, or a high temperature, or a loss of, or change in, their normal sense of taste or smell (anosmia). If the child has a positive test result but do not have [symptoms](#), they should stay at home and self-isolate for 10 days from the date the positive test was taken. This isolation period will be extended if they go on to develop symptoms by counting 10 full days from the day following their symptom onset.

Toot Hill School | The Banks, Bingham, Nottingham NG13 8BL  
Telephone: 01949 875550 | Email: [contact@toothillschool.co.uk](mailto:contact@toothillschool.co.uk) | Website: [www.toothillschool.co.uk](http://www.toothillschool.co.uk)

Executive Head Teacher: **Sandra Paley** BSc (Hons), PGCE, MEd | Head of School: **Christopher Eardley** BSc (Hons), PGCE, PhD

Toot Hill School is a member of the Nova Education Trust | Registered in England and Wales – No. 7635510  
Registered Office: C19, The Sir Colin Campbell Building, University of Nottingham Innovation Park, Triumph Road, Nottingham NG7 2TU, ENGLAND

Anyone with symptoms will be eligible for a PCR test (the normally available test type) and this can be arranged via [Get a free PCR test to check if you have coronavirus \(COVID-19\) - GOV.UK \(www.gov.uk\)](#) or by calling 119.

### **Accessing School Work when Self-isolating**

If self-isolating at home and a student is well enough to do so, they should access work through the subject areas of the school website. Each area has a tab called 'Self-isolation' work. Students should aim to follow their normal school timetable. Students should also check MS Teams for additional learning resources from their teachers, as well as their school email.

### **Instructions for people who live in the same household as someone with COVID-19 (tested positive or symptomatic awaiting a test result)**

[You are not required to self-isolate if you are a contact of someone who has tested positive for COVID-19](#) and any of the following apply:

- you are fully vaccinated
- you are below the age of 18 years 6 months
- you have taken part in or are currently part of an approved COVID-19 vaccine trial
- you are not able to get vaccinated for medical reasons

Fully vaccinated means that you have been vaccinated with an MHRA approved COVID-19 vaccine in the UK, and at least 14 days have passed since you received the recommended doses of that vaccine.

NHS Test and Trace will contact you to let you know that you have been identified as a contact and check whether you are legally required to self-isolate. If you are not legally required to self-isolate, you will be provided with advice on testing and given guidance on preventing the spread of COVID-19. Even if you do not have symptoms, [you will be advised to have a PCR test as soon as possible](#).

Any member of the household who is aged 18 years and 6 months or over and has only received one dose of COVID-19 vaccine or has not received any dose of the COVID-19 vaccination will still be required to self-isolate as household contact of a someone with COVID-19 symptoms awaiting testing and someone who has tested positive for COVID-19. Please read the [stay at home guidance](#) which provides information on this.

Household members who are not exempt from isolation as close contacts should not go to work, school/college/childcare/education setting or public areas, and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online. Household members staying at home for 10 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

You could be fined if you do not self-isolate following a notification by NHS Test and Trace. You may be entitled to a one-off payment of £500 through the [NHS Test and](#)

[Trace Support Payment scheme](#) if you are required to stay at home and self-isolate or you are the parent or guardian of a child who has been told to self-isolate.

Those who are [clinically extremely vulnerable](#) should be supported to minimise their contact with other people in the household during this period, regardless of whether others have symptoms or not.

### **Instructions for household contacts who are not required to self-isolate**

Even if you are vaccinated, you can still be infected with COVID-19 and pass it on to others. If you are identified as a contact of someone with COVID-19 but you are not required to self-isolate, you can help protect others by following the [guidance on how to stay safe and help prevent the spread](#). As well as getting a PCR test, you may also consider:

- limiting close contact with other people outside your household, especially in enclosed spaces
- wearing a face covering for those aged 11 and over in crowded places such as school/college/public transport
- limiting contact with anyone who is clinically extremely vulnerable
- taking part in [regular LFD testing](#)

You should follow this advice while the person in your household with COVID-19 is self-isolating.

If you are a health or social care worker or a student undertaking a work placement who has been identified as a household contact and are exempt from self-isolation, there is [additional guidance available](#) that you should follow to reduce the risk of spread of COVID-19 in these settings.

If you develop [symptoms](#) at any time, even if these are mild, self-isolate immediately, [arrange to have a COVID-19 PCR test](#) and follow the [guidance for people with COVID-19 symptoms](#).

### **For most people, coronavirus (COVID-19) will be a mild illness.**

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

### **How to stop coronavirus (COVID-19) spreading**

There are things that the NHS advises to help reduce the risk of you and anyone you live with getting ill with coronavirus (COVID-19):

- get vaccinated – everyone aged 18 and over can [book COVID-19 vaccination appointments](#) now and 16-17 year olds are being offered 1 dose of the vaccination

- wash your hands with soap and water or use hand sanitiser regularly throughout the day
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
- meet people outside and avoid crowded areas
- open doors and windows to let in fresh air if meeting people inside
- wear a face covering if aged 11 and over when it's hard to stay away from other people – particularly indoors or in crowded places
- participate in twice weekly LFD testing following national guidelines (recommended for 11 years and over). We encourage you to log your results here: <https://www.gov.uk/log-test-site-covid19-results>

Yours sincerely,
